

NAVIGATE YOUR GROWTH

Growing your multisite practice—whether you're expanding from one to 20 locations or already have hundreds—requires navigating skillfully along a path that is filled with a host of options and decisions.

As you make the choices that will define your organization, selecting practice management software may not be the first thing you think of, but it is the foundation on which you will build your growth. It can set your organization up for long-term success—or struggle. You need a practice management system that is centralized, to give you immediate control of everything from scheduling to patient records and reporting. And the bigger your organization grows the more important centralization becomes.

We have been a leader in the dental industry for many years. We feel your pain, we understand your issues and we have the solutions you need. Dentrix Ascend and Dentrix Enterprise both provide centralized control and reporting for your multisite practice. They are the tools you need to take control of your practice's growth.

DENTRIX ASCEND— GROWTH BY DESIGN

Dentrix Ascend is cloud-based practice management software that provides the perfect balance of control and flexibility as you expand your dental practice.

Easily view your business metrics, thanks to built-in intelligence that provides site-specific reporting across your dental group.

Meet clinical needs with a customizable, real-time patient chart and cloud-based imaging. Clinical notes, treatment plans and images are instantly available in any office across the practice.

Pay by the month to maximize cash flow and minimize upfront costs.

Grow at your own speed by adding offices with minimal installation costs and no server purchase required.

Be productive from day one with a natural user interface that requires little or no training and automation of repetitive tasks.

DENTRIX ENTERPRISE— FROM COMPLEX TO COMFORTABLE

Dentrix Enterprise is the enterprise-scale software solution used by some of the largest dental organizations in the world, as well as small- to medium-size multisite practices. This highly customizable server-based system tackles the complex issues of centralizing and streamlining data with ease.

Get the same familiar look and feel of Dentrix and its workflows, with the added benefit of being built on a relational SQL database.

Work more efficiently by managing information from all locations and providers in a robust single database. This helps standardize front- and back-office operations, accounting and clinical procedures across the entire multilocation practice.

Manage and track any patient across all locations or providers with a single patient record.

Achieve your financial goals with features like line-item accounting, suspended credits and integrated credit-card processing (with AxiaMed) that allow you to gain efficiencies in insurance claims, payments, revenue generation, insurance eligibility and copay-collection processes.

Manage advanced security roles and models with active directory credentials management tools so users can focus on their most critical job tasks.
